

HIGH CARD FLUSH

High Card Flush is one of the easiest casino table games to learn. Using poker's basic flush rankings to determine the winner makes the object of the game pretty straightforward.

High Card Flush is played with a standard 52 card deck. Seven cards are dealt to all the players and the dealer. The dealer qualifies with a three card, nine high flush. The player's hand is made of the highest number of cards in a given suit.

HOW TO PLAY HIGH CARD FLUSH

To begin play against the dealer, the player must make an Ante wager. At this time, the player may also make the optional Flush and Straight Flush bets. After viewing their cards, the player decides whether to make a Raise wager or fold.

If their hand is a six-or seven-card flush, a player may Raise up to three times the Ante. If the hand is a five-card flush, the player may Raise up to two times the Ante. If the hand is a two to four-card flush, the player may only place a Raise wager equal to the Ante. The hand with the highest number of cards of the same suit wins.

The dealer must qualify with a 9-high three card flush or better. To win the Ante and Raise bets, the dealer must qualify and the player's hand must beat the dealers. If the player and the dealer tie, both bets push. If the dealer doesn't qualify, the Ante bet gets paid and the Raise bet pushes.

RANKING OF HANDS

The highest hand is the hand with the highest number of cards in one suit, along with the highest-ranking card if the dealer and player have the same number of flush cards. A straight flush holds no value other than the value of the individual cards. A straight flush does have value for the Straight Flush Bonus wager.

FLUSH BONUS

The player wins on the Flush Bonus spot when they are dealt a 4-card flush or better. Players must place an Ante wager in order to play the Flush Bonus. A Flush Bonus winning wager is always paid, regardless of the dealer's hand.

FLUSH BONUS PAY TABLE:

Seven Suited Cards	100 to 1
Six Suited Cards	20 to 1
Five Suited Cards	10 to 1
Four Suited Cards	2 to 1

HIGH CARD FLUSH

STRAIGHT FLUSH BONUS

The player wins on the Straight Flush Bonus spot when they are dealt a 3-card straight flush or better. The player must place an Ante wager in order to play the Straight Flush Bonus. The winning Straight Flush wager is always paid, regardless of the dealer's hand.

STRAIGHT FLUSH BONUS:

Seven Card Straight Flush	500 to 1
Six Card Straight Flush	200 to 1
Five Card Straight Flush	100 to 1
Four Card Straight Flush	50 to 1
Three Card Straight Flush	9 to 1

HIGH CARD FLUSH PROGRESSIVE

The High Card Flush Progressive is an optional \$1 bet. The bet considers the best hand possible among each individual player's cards. When there is more than one (1) qualified progressive jackpot hand, requiring the 100% payout, the jackpot is divided equally amongst each qualifying 100% winner.

If multiple progressive payout percentage hands hit during the same round, the 100% is paid first. The progressive jackpot will then be reseeded. All other qualifying percentage payouts will be paid from the reseeded amount. The dealer will start the pay sequence from the dealer's farthest right, and continue from right to left. Multiple qualifying progressive winners other than the percentage payouts are paid according to the Progressive Pay Table.

PROGRESSIVE PAYOUTS

Seven Card Straight Flush or	
Six Card Royal (A-K-Q-J-T-9 Suited)	100%
Six Card Straight Flush	10%
Five Card Straight Flush	\$300
Four Card Straight Flush	\$50
Three Card Straight Flush	\$3

HOUSE RULES

Players may only play one hand. Side betting is strictly prohibited on the casino floor. All decisions made by the Floor Supervisor are final.
